PLEASE NOTE: There is no first minor release of the 10th release of SOFA for ANSI C. The first minor release included changes relevant to the Fortran version of the SOFA library only.

List of Changes for the second minor release of the 10th release of SOFA as of 2014 February 17.

 FORTRAN & ANSI C Files

Date emailed	File	Reason
2013 Dec 05	apcol3	Documentation error. Given argument THETA Earth rotation angle (radians) included incorrectly in the information list.
2013 Dec 05	atioq	Documentation error. Returned argument DOB, which is the observed declination (CIO-based, radians), was described incorrectly and the argument ROB, observed right ascension (CIO-based, radians), was missing from the information list.
2014 Feb 15	d2dtf	Error. The routine truncated rather than rounded in the (uncommon) case of a time in the second half of a leap second and a precision of 1 second. In addition, the rounding behavior during leap seconds has been changed so that for a precision of 10 seconds or coarser the beginning of the next day is used in preference to the start of the leap second.

 Documentation Files

2013 Dec 31	sofa_ts_f.pdf sofa_ts_c.pdf	Two errors in the example program in Section 4.4: "A comprehensive example: transform UTC into other times" (1) +0.5 is required to be added to the UT variable (page 23 C version, page 24 Fortran) as time is measured from midnight; (2) On page 24, in the routine DTDB the units for the variables, U and V (i.e. the last two arguments) are required in kilometers and not in meters as calculated. This results, on page 25, in a small difference in the TDB and TCB times reported.
2013 Dec 31	sofa_ts.tex	Changes as described above. File not distributed.
